

For just USD10,000, you can have an ERP system to run your entire business.

DreamScope™ DS1184, an **ERP system comes from USA**, embedded with all the **system software, database server, web server, mail server, report generator, DreamScope™ Enterprise Operating System and ERP application modules comprising financial and project accounting, sales purchase, inventory and distribution.** You may also, optionally, add in **e-commerce, e-procurement, exchange, customer relationship management (CRM), engineering, manufacturing and space management modules.**

Features & Benefits

- Appliance Hosted** - Simply connect to your network and you are ready to go, from day one!
- Browser Based** - Access from anywhere, using any computer through industry standard web-browsers.
- Connection-less Architecture** - No direct session-based database access making it possible to support a large user base, in a secured manner, without requiring a large infrastructure.
- Unlimited User License** - No additional cost as your usage increases.
- Unlimited Company License** - Host as many companies as you want, as long as they are all hosted on the same appliance.
- Powerful Embedded Database** - No additional cost of scaling your system as your business grows and usage increases.
- Comprehensive Preloaded Applications** - Come standard with the most popular application modules.
- Optional Add-on Applications** - You may optionally add desired application modules as and when you need.
- Multiple Business Models** - Supports a variety of business models that reflect the realities of your day-to-day business operation.
- Easy Custom Reports** - Modify standard reports or add new reports, using industry standard Crystal Reports.
- Easy Customization** - Get the Customization License and customize application for different companies hosted on the same server appliance.
- Comprehensive Workbook** - Included to facilitate implementation by example.
- Flexible and Modular Support Options** - Low cost implementation and maintenance.
